

Start Right

Introducing **STARTING BRIGHT PAPER™ ROLLS**

Make your images really stand out while reducing your printing costs.

Now you can start with a background of vivid colors in Yellow, Green, Orange or Red and make your signs sizzle! Introducing our new Starting Bright Paper™ rolls designed specifically for all types of wide format inkjet printers using water based inks including Canon & HP brands.

SAVE ON INK

● Typically your biggest expense with your inkjet printer is the ink. Now, you can start with our colored paper rolls, while reducing ink costs and without giving up the background. Create your designs using either black ink, or select complimentary colors to enhance your background color. See our website www.brightwhitepaper.com for color match ideas. Great for any type of signage including announcements, functions, menus, etc.

MIX OR MATCH COLORS

● Starting Bright Paper™ rolls come individually or discounted in 4 packs - mix or match the colors you want. We start with a heavy weight coated paper roll designed to accept more ink than simple bond paper. Each roll is 24" x 100', not much more expensive than a standard roll of white paper. Starting Bright Paper™ rolls can also be custom color matched based on minimum quantities. If your company requires Pantone® match colors, let us know and we'll be glad to work up a custom quote.
