

# STOP overpaying for your cold laminate refills

## **VARITRONICS PROFINISH**

## **VARIQUEST 2510**

Customers love their cold laminators but hate the high expense of the laminate refills. That's why owning a Varitronics® or a Variquest® cold laminator is a bad idea! These laminators are **proprietary systems** requiring customers to overpay for their refills compared to Xyron, the manufacturer, and their 25" wide cold laminator called the 2500.

Xyron manufactures the ProFinish (24") & VariQuest 2510 (25") for Varitronics® / VariQuest®. Standard cold laminate width is 25" but the ProFinish® is 24" wide and costs as much as \$299.99 a set Vs. about \$235 for the identical laminate from Xyron in 25". The VariQuest® 2510 machine is slightly different. The green and red hubs you slide into the laminator are a narrower width than Xyron's 25" standard hub creating a system where customer's are again forced to spend more for their laminate than the Xyron 2500 systems.

For customers tired of overpaying for their laminate refills but love using their cold laminators, we have an incredible opportunity to rid yourself forever of the hassles and expense.

**Who We Are:** Bright White Paper Co. is Xyron's largest education reseller in the U.S. Our laminators and laminate is in stock 99% of the time.
